Introduction

Guests are the source of revenue for a hotel.

As the frequency of booking cancellations grows, this revenue falls.

As consultants, our goal is to figure out why bookings are canceled.

We examined the hotel's booking data and ran an analysis to determine which factors influence cancellations.

If we can properly target the issues, we will be able to reduce cancellations and improve revenue.

Objectives

1. To find out the conditions that are influencing hotel reservation cancelations by guests.
2. To predict which guest is going to cancel a booking based on various factors.
3. To recommend possible solutions to the hotel management in order to increase revenue.

Business Questions

Does opting for RequiredParkingSpace while making hotel reservations impact cancellations?

Is it possible to associate meal plans and StaysinWeeknights with possible hotel booking cancellations?

Which market segment influences the cancellations the most?

Does DepositType affect cancellations?

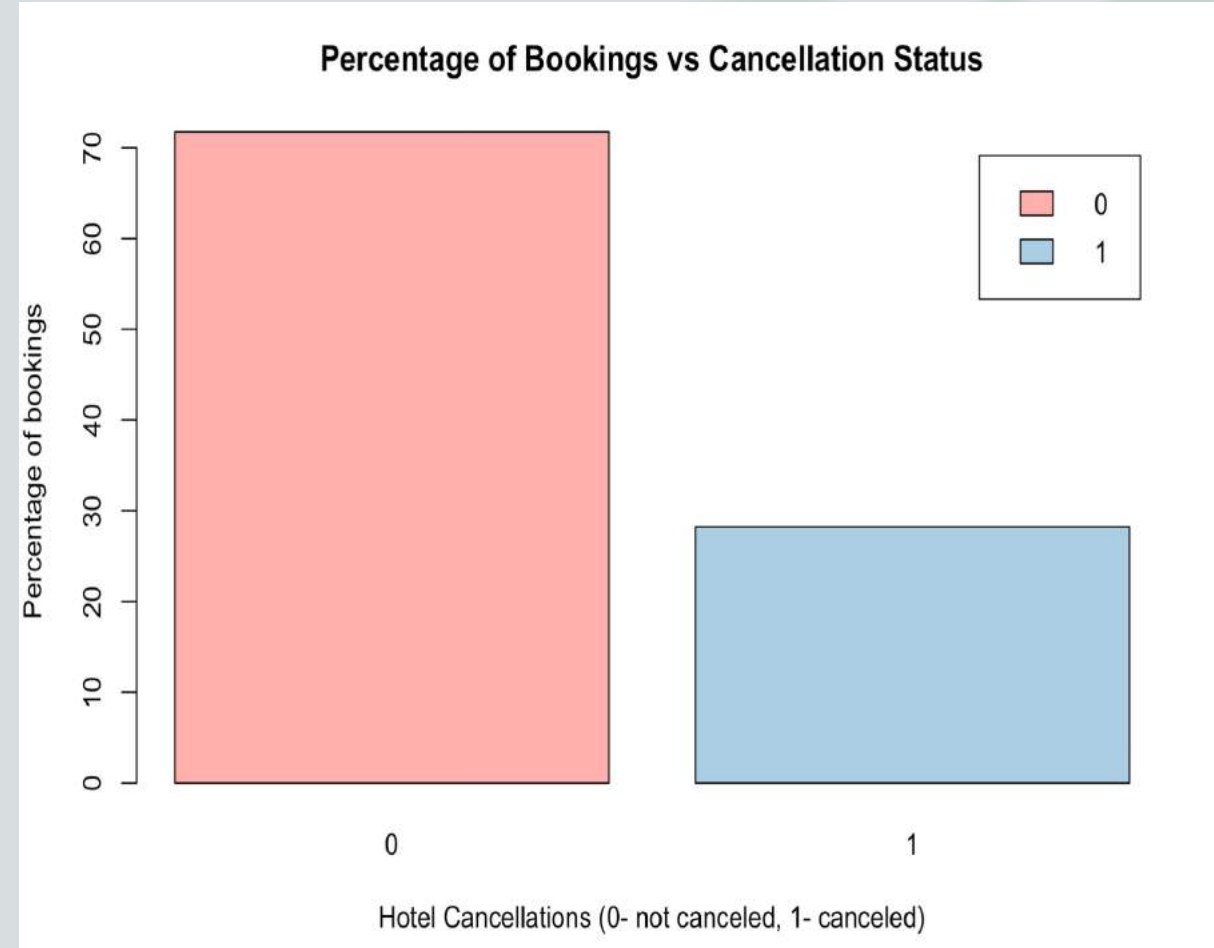

Are customers making cancellations based on the rooms they were assigned?

Are customers who have made special requests while making hotel reservations less likely to cancel?

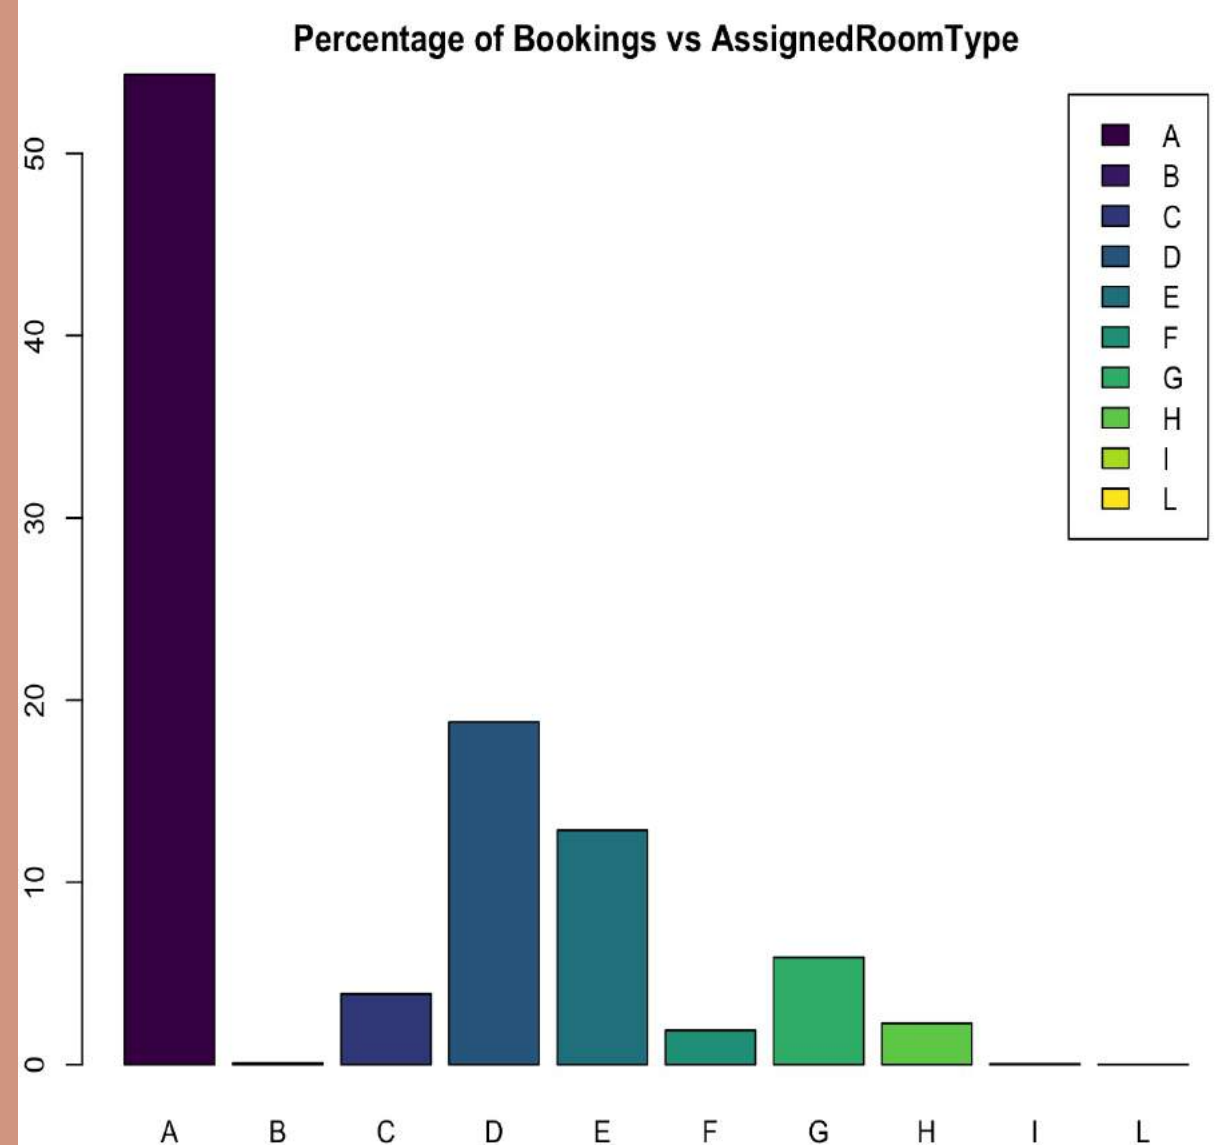

Initial Descriptive Analysis

What is the relative percentage of canceled & non-canceled bookings?

How are cancelled bookings related to room type?

How are cancellations distributed by Market segments?

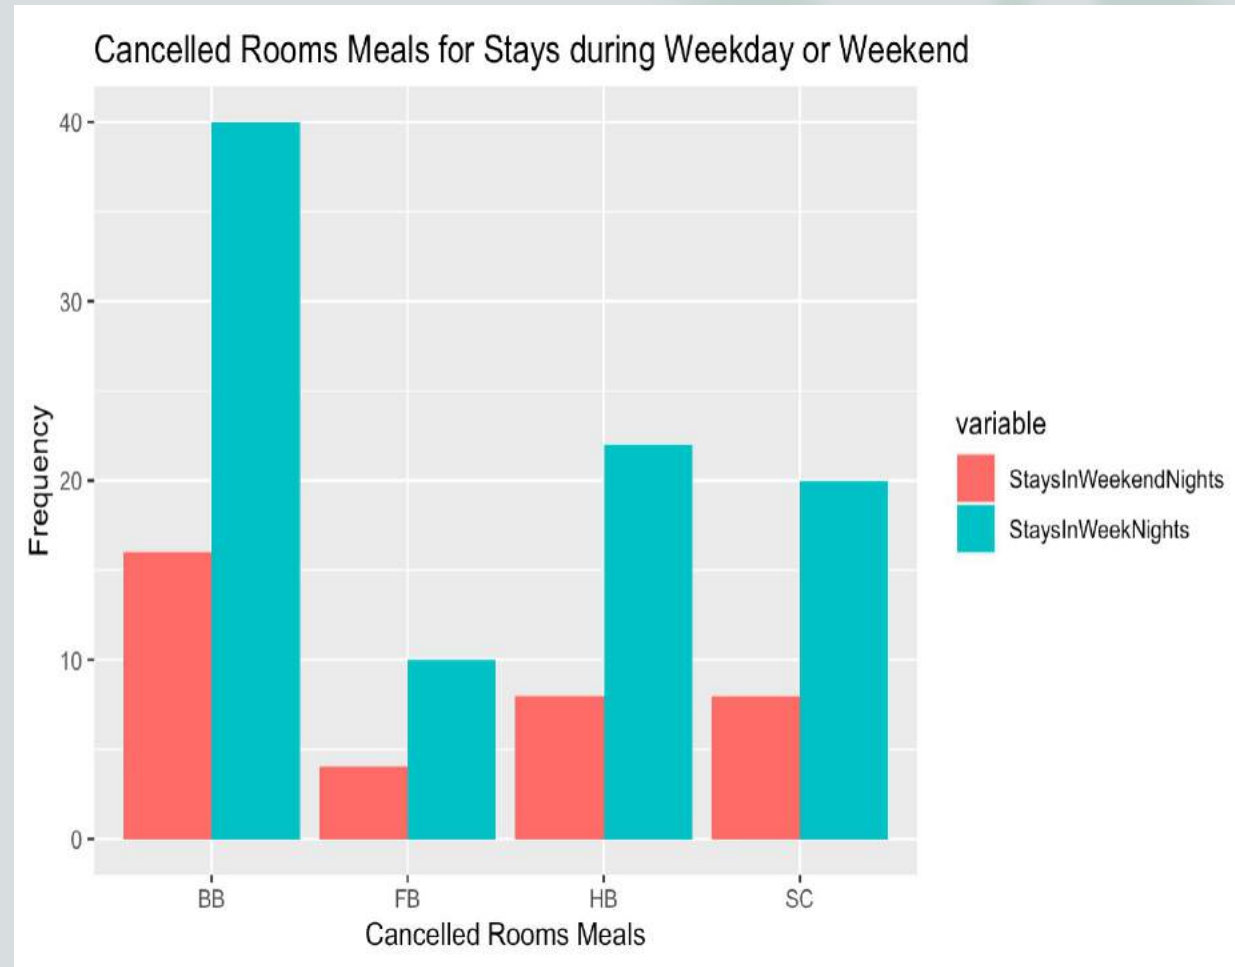

Focusing on canceled bookings, how are weekend and week stays distributed by market segments?

How are cancellations distributed by Types of meals?

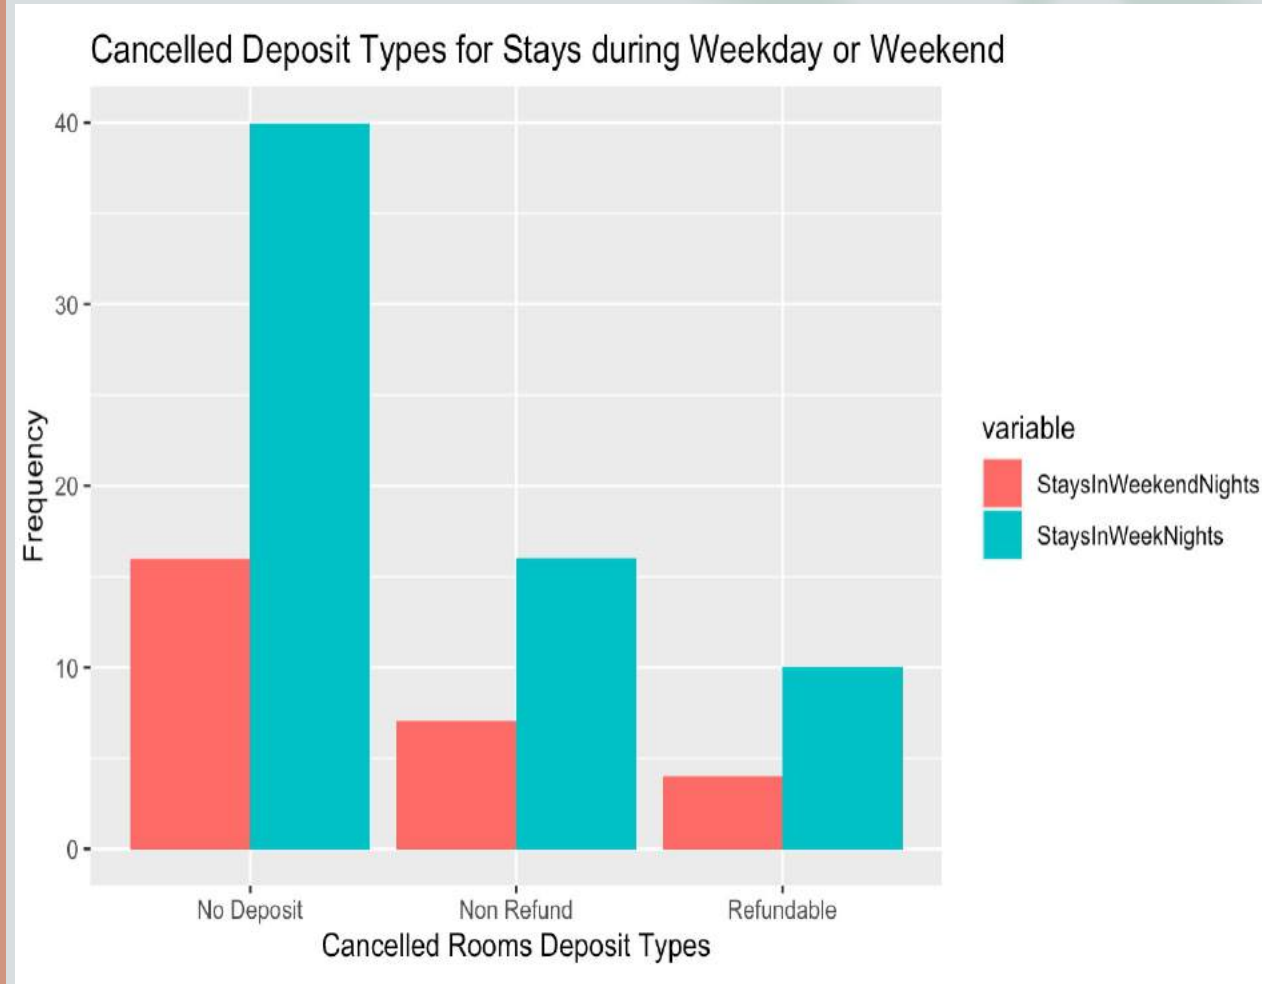

Focusing on canceled bookings, how are weekend and week stays distributed by Types of meals?

How are cancellations distributed by Deposit type?

Focusing on canceled bookings, how are weekend and week stays distributed by Deposit Types?

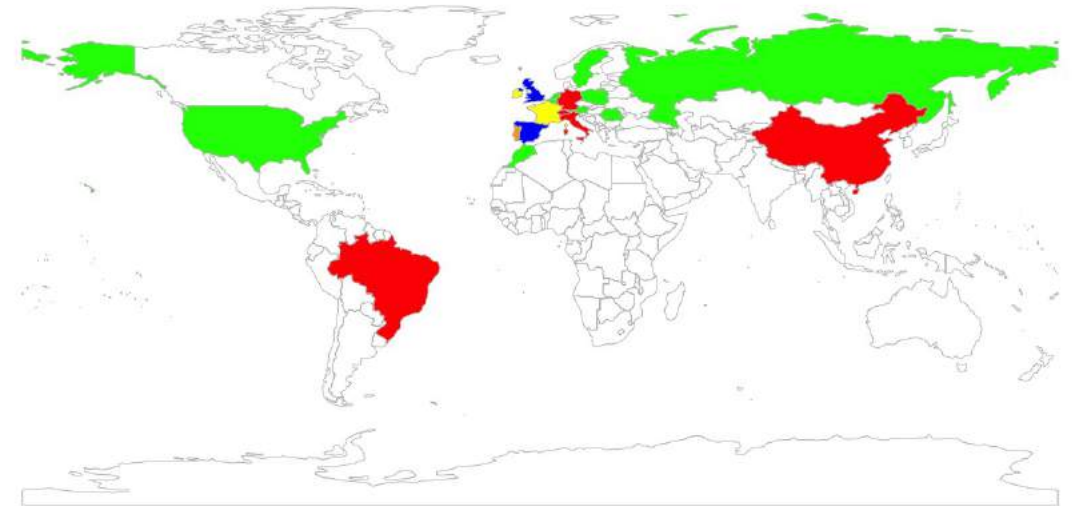

Do cancellations depend upon the difference between booking and check-in dates?

How are the booking
cancellations distributed
across various countries?
